CONTENTS OF VOLUME 12

Number 1

K. J. Rowe and E. H. Rutter — 1 — Palaeostress estimation using calcite twinning: experimental calibration and application to nature

H. Stel and M. Breedveld — 19 — Crystallographic orientation patterns of myrmekitic quartz: a fabric memory in quartz ribbon-bearing gneisses

R. D. Law, S. M. Schmid and J. Wheeler — 29 — Simple shear deformation and quartz crystallographic fabrics: a possible natural example from the Torridon area of NW Scotland

A. J. Hyett — 47 — Deformation around a thrust tip in Carboniferous limestone at Tutt Head, near Swansea, South Wales

M. L. F. Bamford and M. Ford — 59 — Flexural shear in a periclinal fold from the Irish Variscides

F. X. Murphy — 69 — The role of pressure solution and intermicrolithon-slip in the development of disjunctive cleavage domains: a study from Helvick Head in the Irish Variscides

N. J. Soper and A. K. Higgins — 83 — Models for the Ellesmerian mountain front in North Greenland: a basin margin inverted by basement uplift

R. G. Gibson — 99 — Proterozoic contact relationships between gneissic basement and metasedimentary cover in the Needle Mountains, Colorado, U.S.A.

F. Thouvenot and G. Ménard — 113 — Allochthony of the Chartreuse Subalpine massif: explosion-seismology constraints

A. Aydin and R. A. Schultz — 123 — Effect of mechanical interaction on the development of strike-slip faults with echelon patterns

D. G. De Paor — 131 — Determination of the strain ellipsoid from sectional data

Brevia

K. Kanagawa — 139 — Automated two-dimensional strain analysis from deformed elliptical markers using an image analysis system

Number 2

P. F. Williams and G. P. Price — 145 — Origin of kinkbands and shear-band cleavage in shear zones: an experimental study

S. S. Bhagat and S. Marshak — 165 — Microlithon alteration associated with development of solution cleavage in argillaceous limestone: textural, trace-elemental and stable-isotopic observations

H.-R. Wenk and J. Pannetier — 177 — Texture development in deformed granodiorites from the Santa Rosa mylonite zone, southern California

M. D. Jackson and D. D. Pollard — 185 — Flexure and faulting of sedimentary host rocks during growth of igneous domes, Henry Mountains, Utah

W. M. Dunne and C. P. North — 207 Orthogonal fracture systems at the limits of thrusting: an example from southwestern Wales

J. P. Turner and P. L. Hancock — 217 Relationships between thrusting and joint systems in the Jaca thrust-top basin, Spanish Pyrenees

R. S. Stanley — 227 The evolution of mesoscopic imbricate thrust faults—an example from the Vermont Foreland, U.S.A.

E. Scheuber and P. A. M. Andriessen — 243 The kinematic and geodynamic significance of the Atacama fault zone, northern Chile

F. Roure, D. G. Howell, C. Müller and I. Moretti — 259 Late Cenozoic subduction complex of Sicily

W. D. Means — 267 One-dimensional kinematics of stretching faults

M. R. Abbassi and N. S. Mancktelow — 273 The effect of initial perturbation shape and symmetry on fold development

Number 3

283 Editorial

J. A. Dockal and J. R. Huntsman — 285 Application of turbidite sedimentology to determination of thrust fault displacements in the Carolina Slate Belt

A. Taboada, J. F. Ritz and J. Malavieille — 297 Effect of ramp geometry on deformation in a ductile décollement level

E. R. Ivins, T. H. Dixon and M. P. Golombek — 303 Extensional reactivation of an abandoned thrust: a bound on shallowing in the brittle regime

J. M. Stock and K. V. Hodges — 315 Miocene to Recent structural development of an extensional accommodation zone, northeastern Baja California, Mexico

N. H. Woodcock — 329 Transpressive Acadian deformation across the Central Wales Lineament

R. G. Gibson — 339 Nucleation and growth of retrograde shear zones: an example from the Needle Mountains, Colorado, U.S.A.

G. J. Borradaile and J. McArthur — 351 Experimental calcite fabrics in a synthetic weaker aggregate by coaxial and non-coaxial deformation

D. Sokoutis — 365 Experimental mullions at single and double interfaces

D. Waltham — 375 Finite difference modelling of sandbox analogues, compaction and detachment free deformation

S. H. Treagus — 383 The Mohr diagram for three-dimensional reciprocal stretch vs rotation

397 Book Reviews

Number 4

G. M. PROTZMAN and G. MITRA — 403 Strain fabric associated with the Meade thrust sheet: implications for cross-section balancing

K. O'HARA — 419 State of strain in mylonites from the western Blue Ridge province, southern Appalachians: the role of volume loss

D. S. COWAN — 431 Kinematic analysis of shear zones in sandstone and mudstone of the Shimanto belt, Shikoku, SW Japan

R. E. HOLDSWORTH — 443 Progressive deformation structures associated with ductile thrusts in the Moine Nappe, Sutherland, N. Scotland

R. R. GOTTSCHALK — 453 Structural evolution of the schist belt, south-central Brooks Range fold and thrust belt, Alaska

R. J. TWISS and M. J. GEFELL — 471 Curved slickenfibers: a new brittle shear sense indicator with application to a sheared serpentinite

D. M. FISHER — 483 Orientation history and rheology in slates, Kodiak and Afognak Islands, Alaska

M. T. SWANSON — 499 Extensional duplexing in the York Cliffs strike-slip fault system, southern coastal Maine

Brevia

C. W. PASSCHIER — 513 A Mohr circle construction to plot the stretch history of material lines

517 Book Reviews

Number 5/6

Special Issue: Australasian Tectonics

v Preface

P. J. CONEY, A. EDWARDS, R. HINE, F. MORRISON and D. WINDRIM — 519 The regional tectonics of the Tasman orogenic system, eastern Australia

J. J. VEEVERS and C. McA. POWELL — 545 Phanerozoic tectonic regimes of Australia reflect global events

C. McA. POWELL, Z. X. LI, G. A. THRUPP and P. W. SCHMIDT — 553 Australian Palaeozoic palaeomagnetism and tectonics—I. Tectonostratigraphic terrane constraints from the Tasman Fold Belt

Z. X. LI, C. McA. POWELL, G. A. THRUPP and P. W. SCHMIDT — 567 Australian Palaeozoic palaeomagnetism and tectonics—II. A revised apparent polar wander path and palaeogeography

C. L. FERGUSSON and A. H. M. VANDENBERG — 577 Middle Palaeozoic thrusting in the eastern Lachlan Fold Belt, southeastern Australia

C. L. FERGUSSON, R. A. HENDERSON and E. C. LEITCH — 591 Subduction complex melange of the Wandilla terrane, Palaeozoic New England Orogen, central Queensland, Australia

R. A. GLEN 601 Formation and inversion of transtensional basins in the western part of the Lachlan Fold Belt, Australia, with emphasis on the Cobar Basin

P. G. STUART-SMITH 621 The emplacement and fault history of the Coolac Serpentinite, Lachlan Fold Belt, southeastern Australia

S. R. PATERSON, O. T. TOBISCH and V. J. MORAND 639 The influence of large ductile shear zones on the emplacement and deformation of the Wyangala Batholith, SE Australia

P. H. G. M. DIRKS and C. J. L. WILSON 651 The geological evolution of the Reynolds Range, central Australia: evidence for three distinct structural–metamorphic cycles

A. R. NORMAN and G. L. CLARKE 667 A barometric response to late compression in the Strangways Metamorphic Complex, Arunta Block, central Australia

I. M. TYLER and A. M. THORNE 685 The northern margin of the Capricorn Orogen, Western Australia—an example of an Early Proterozoic collision zone

I. M. TYLER and T. J. GRIFFIN 703 Structural development of the King Leopold Orogen, Kimberley region, Western Australia

R. J. NORRIS, P. O. KOONS and A. F. COOPER 715 The obliquely-convergent plate boundary in the South Island of New Zealand: implications for ancient collision zones

S. E. JOHNSON 727 Deformation history of the Otago schists, New Zealand, from progressively developed porphyroblast-matrix microstructures: uplift-collapse orogenesis and its implications

A. D. GEORGE 747 Deformation processes in an accretionary prism: a study from the Torlesse terrane of New Zealand

K. MCCUE 761 Australia's large earthquakes and Recent fault scarps

K. STÜWE and C. J. L. WILSON 767 Interaction between deformation and charnockite emplacement in the Bunger Hills, East Antarctica

A. MEIKE 785 Dislocation enhanced selective dissolution: an examination of mechanical aspects using deformation-mechanism maps

A. D. GIBBS 795 Linked fault families in basin formation

Number 7

J. L. LAGARDE, S. AIT OMAR and B. RODDAZ 805 Structural characteristics of granitic plutons emplaced during weak regional deformation: examples from late Carboniferous plutons, Morocco

J. CUEVAS and J. M. TUBÍA 823 Quartz fabric evolution within the Adra Nappe (Betic Cordilleras, Spain)

N. T. GRANT 835 Episodic discrete and distributed deformation: consequences and controls in a thrust culmination from the central Pyrenees

M. L. Wells and R. W. Allmendinger — 851 — An early history of pure shear in the upper plate of the Raft River metamorphic core complex: Black Pine Mountains, southern Idaho

S. J. Martel — 869 — Formation of compound strike-slip fault zones, Mount Abbot quadrangle, California

C. M. Onasch — 883 — Microfractures and their role in deformation of a quartz arenite from the central Appalachian foreland

L. S. Hollister — 895 — Enrichment of CO_2 in fluid inclusions in quartz by removal of H_2O during crystal-plastic deformation

J. S. Chester and F. M. Chester — 903 — Fault-propagation folds above thrusts with constant dip

F. Odonne — 911 — The control of deformation intensity around a fault: natural and experimental examples

Brevia

D. G. De Paor — 923 — The theory of shear stress and shear strain on planes inclined to the principal directions

D. M. Ragan — 929 — Direction of shear

W. M. Dunne, C. M. Onasch and R. T. Williams — 933 — The problem of strain-marker centers and the Fry method

D. D. Schultz-Ela — 939 — A method for estimating errors in calculated strains

W. C. Haneberg — 945 — A Lagrangian interpolation method for three-point problems

949 — Diary

Number 8

951 — Editorial

W. D. Means — 953 — Review Paper—Kinematics, stress, deformation and material behavior

R. Marrett and R. W. Allmendinger — 973 — Kinematic analysis of fault-slip data

E. Carrio-Schaffhauser and P. Gaviglio — 987 — Pressure solution and cementation stimulated by faulting in limestones

A. Krohe — 995 — Local variations in quartz [*c*]-axis orientations in non-coaxial regimes and their significance for the mechanics of *S*–*C* fabrics

B. Ildefonse, J.-M. Lardeaux and J.-M. Caron — 1005 — The behavior of shape preferred orientations in metamorphic rocks: amphiboles and jadeites from the Monte Mucrone area (Sesia-Lanzo zone, Italian Western Alps)

D. Leblanc — 1013 — Tectonic adaptation of the External Zones around the curved core of an orogen: the Gibraltar Arc

M. P. Stubley — 1019 — The geometry and kinematics of a suite of conjugate kink bands, southeastern Australia

S. RALSER 1033 Shear zones developed in an experimentally deformed quartz mylonite

E. A. ERSLEV and H. GE 1047 Least-squares center-to-center and mean object ellipse fabric analysis

Brevia

J. P. EVANS 1061 Thickness–displacement relationships for fault zones

G. RANALLI and Z.-M. YIN 1067 Critical stress difference and orientation of faults in rocks with strength anisotropies: the two-dimensional case

B. A. VAN DER PLUIJM 1073 Synchroneity of folding and crosscutting cleavage in the Newfoundland Appalachians?

R. S. BLEWETT 1077 Structural evolution of a transpression zone in north central Newfoundland: Discussion

B. LAFRANCE 1079 Structural evolution of a transpression zone in north central Newfoundland: Reply

W. R. FITCHES, R. CAVE, J. CRAIG and A. J. MALTMAN 1081 The flexural-slip mechanism: Discussion

P. W. G. TANNER 1085 The flexural-slip mechanism: Reply
